Reference: Revised Depreciation Rates

On October 17, 2018, Connecticut Light and Power Company (CL&P) submitted proposed revisions to Schedule 21-ES to the ISO New England, Inc.'s (ISO-NE) Open Access Transmission Tariff (OATT) to incorporate revised general plant depreciation rates.¹ You explain that the general depreciation rates are used to calculate CL&P's annual transmission revenue requirements for transmission service under Section II of ISO-NE's Transmission, Markets and Services Tariff. You explain that the proposed depreciation changes are consistent with a Settlement Agreement approved by the Connecticut Public Utilities Regulatory Authority which was the result of a retail rate case that CL&P filed in 2017.

Pursuant to the authority delegated to the Director, Division of Electric Power Regulation – East, under 18 C.F.R. § 375.307, your submittal is accepted for filing, effective May 1, 2018, as requested.

The filing was noticed on October 17, 2018, with comments, interventions, and

protests due on or before November 7, 2018. Granting late interventions at this stage of the proceeding will not disrupt the proceeding or place additional burdens on existing parties.

This acceptance for filing shall not be construed as constituting approval of the referenced filing or of any rate, charge, classification, or any rule, regulation, or practice affecting such rate or service contained in your filing; nor shall such acceptance be deemed as recognition of any claimed contractual right or obligation associated therewith; and such acceptance is without prejudice to any findings or orders that have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against ISO-NE and CL&P.

This order constitutes final agency action. Requests for rehearing by the Commission may be filed within 30 days of the date of issuance of this order, pursuant to 18 C.F.R. § 385.713.
