

188 FERC ¶ 62,038
UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

ISO New England Inc.

Docket No. ES24-41-000

ORDER AUTHORIZING ISSUANCES OF SECURITIES

(Issued July 19, 2024)

On June 17, 2024, ISO New England Inc. (ISO-NE) filed an application pursuant to section 204 of the Federal Power Act¹ requesting authorization to issue senior unsecured notes in an amount not to exceed \$75 million at any one time. ISO-NE states that it is a Regional Transmission Organization (RTO) recovers its interest expense through its tariff.

ISO-NE also requests waiver from the Commission's competitive bidding and negotiated placement requirements at 18 C.F.R. § 34.2(a) (2023).

The filing was noticed on June 18, 2024, with comments, protests, or interventions due on or before July 8, 2024. National Grid filed a motion to intervene. Notices of intervention and unopposed timely filed motions to intervene are granted pursuant to the operation of Rule 214 of the Commission's Rules of Practice and Procedure (18 C.F.R. § 385.214 (2023)).

On February 21, 2003, the Commission issued an order announcing four restrictions on all future public utility issuances of secured and unsecured debt.² First, public utilities seeking authorization to issue debt backed by a utility asset must use the proceeds of the debt for utility purposes. Second, if any utility assets that secure debt issuances are divested, the debt must follow the asset and also be divested. Third, if any of the proceeds from unsecured debt are used for non-utility purposes, the debt must follow the non-utility assets. Specifically, if the non-utility assets are divested, then a proportionate share of the debt must follow the divested non-utility asset. Finally, if utility assets financed by unsecured debt are divested to another entity, then a proportionate share of the debt must also be divested.

ISO-NE is authorized to issue the securities subject to the interest rates as stated in

¹ 16 U.S.C. § 824c.

the application. Although ISO-NE does not meet the two times interest coverage ratio, the Commission has stated that recovery of financing costs through an RTO's tariff provides an alternative basis to conclude that the RTO may reasonably be expected to service its debt and interest expenses without impairing its ability to provide service as a public utility.³

This authorization is based upon the terms and conditions and for the purposes specified in the application subject to the following conditions:

- (1) This authorization is effective from August 1, 2024 through July 31, 2026;
- (2) The securities are subject to the Commission's restrictions on secured and unsecured debt as outlined above and in *Westar*;
- (3) The waiver requested by Applicant of the *pro forma* information required by the Commission's regulation at 18 C.F.R. § 34.4 (2023) is granted;
- (4) The requested waiver for the securities from the Commission's competitive bidding and negotiated placement requirements at 18 C.F.R. § 34.2 (2023) is granted;
- (5) ISO-NE must file a Report of Securities Issued, under 18 C.F.R. §§ 34.9, 131.43, and 131.50 (2023), no later than 30 days after the sale or placement of long-term debt securities;
- (6) This authorization is without prejudice to the authority of the Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of cost or any other matter whatsoever now pending or which may come before this Commission; and
- (7) Nothing in this letter order shall be construed to imply any guarantee or obligation on the part of the United States with respect to any security to which this letter order relates.

This action is taken pursuant to the authority delegated to the Director, Division of Electric Power Regulation - West, under 18 C.F.R. § 375.307 (2023). This order
